

DoorPhone

next generation

Security + Peace-of-Mind + Convenience

The DoorPhone is a wirefree unit providing voice and data communication from inside to outside the home or office.

The user can speak with visitors via the portable handset and remotely operate the door or gate if they wish to let them in.

Simple and fast to install, the DoorPhone is both attractive and practical and has an exceptional degree of reliability as it utilises Daitem's DynaPass® frequency agile radio transmission technology.

Many applications including gate opening, door release, garage door triggering, external light switching and communications between the caller unit and portable handset, make the DoorPhone extremely versatile. A twin button caller unit and keypad version is also available for twin premises.

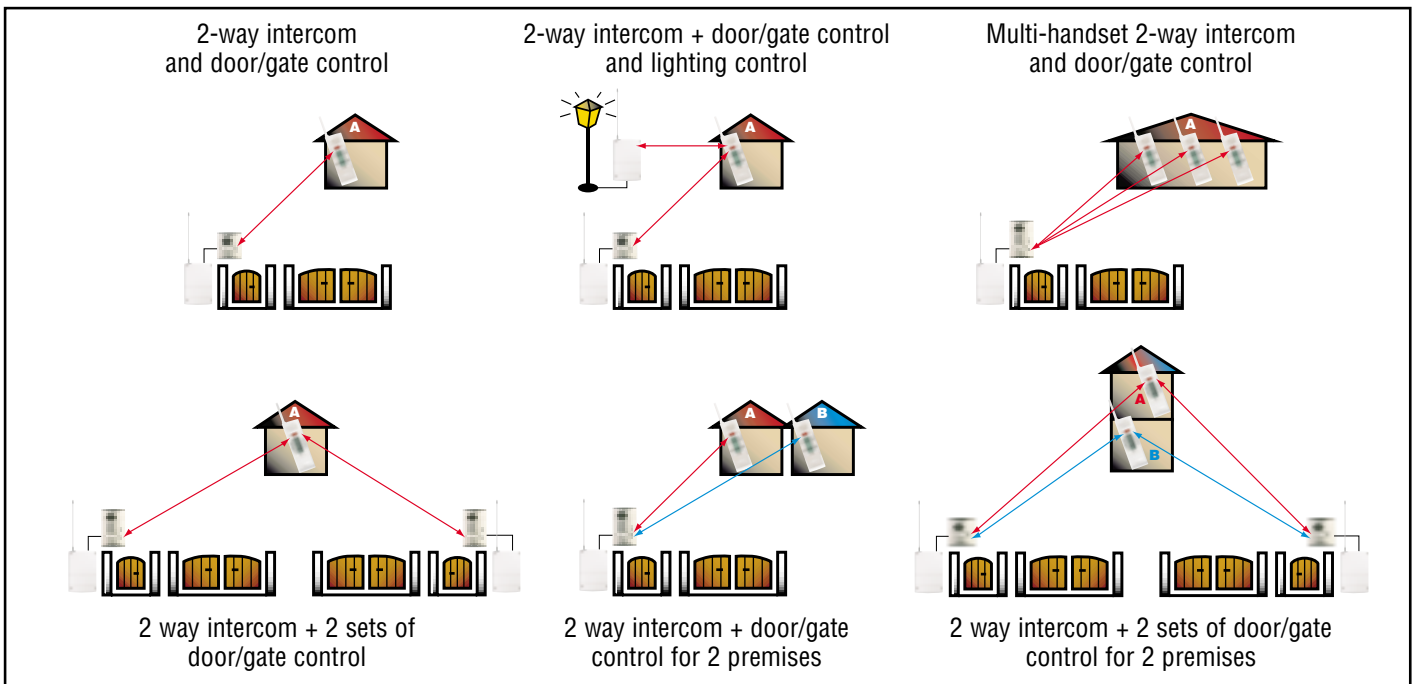

The new DoorPhone has rechargeable handsets and the options of anti-vandal metal covers for the caller units and ac power supplies for the controller. A telescopic antenna for the controller is supplied as standard.

- Totally wirefree communications using DynaPass® Technology.
- Portable phone for communication from house or garden to main entrance.
- No need to cable between house and gate.
- Remotely unlock front door.
- Remotely trigger gate controller.
- Trigger garage door and/or lighting (via accessory module).
- View status of door and gate via handset's display.
- Charger and rechargeable batteries for handset.
- Optional anti-vandal metal covers for external caller unit.
- 3 year warranty (2 years standard, free extension to 3 years upon registration).

Typical Configurations

A modular system

The Caller unit (IP54 rated)

Sited by the front door or gate, this is the outdoor unit by which visitors announce and identify themselves. Available with one or two call buttons and with and without keypad. Comes in white ABS plastic as standard with a ruggedised metal cover as an option.

The Controller (IP54 rated)

Connected to the caller unit, to which it supplies power and for which it makes radio communications.

It directly controls & powers any 12 V latch or an electric lock and depending upon the DoorPhone model & handset can also control and supervise a motor driven gate or door. The auxiliary D5300 lighting controller can also control external lighting and garage doors.

The Handset

Allows the user to identify and welcome visitors, to control the opening of doors and gates and to verify their status, open or closed via its LCD display. The handset can also control lighting when used in conjunction with the D5300 lighting controller.

The cordless handset is recharged by its associated base unit. There are two types available, a battery operated base unit and a mains operated version.

Kits

- D5501GB > Typical door application: single function kit with controller, 1 button caller unit and rechargeable handset with AC power pack.
- D5601GB > Typical gate application: 3 function kit with controller, 1 button caller unit and rechargeable handset with AC power pack.

Handsets

- D5130GB > Single function: operates door release only, white, rechargeable with AC power pack.
- D5131GB > 3 function: operates door release, gate motor & D5300 light control, white, rechargeable with AC power pack.
- D5141 > 3 function, white, operates door release, gate motor & D5300 light control, powered by lithium-ion batteries recharged from batteries in handset base unit. Mains free.
- D5142 > 7 function, white, similar to D5141 but controls 2 x D5200 controllers located at 2 separate entrances.

Caller units

- D5801 > Single button external caller unit.
- D5802 > Two button external caller unit.
- D5821 > Single button external caller unit with keypad.
- D5822 > Two button external caller unit with keypad.

Controllers

- D5200 > Standard 2 way intercom, door/gate controller.
- D5300 > 230 V lighting/garage door control (used in conjunction with D5200).
- EXTPOWER > Optional 12 VAC rechargeable power pack for D5200.
- A7901 > 230 V to 12 VAC transformer for use with EXTPOWER.

Caller unit rugged metal covers

- DB601 > Metal cover for D5801 caller unit.
- DB602 > Metal cover kit for D5802 caller unit.
- DB721 > Metal cover kit for D5821 caller unit with keypad.
- DB722 > Metal cover kit for D5822 caller unit with keypad.

Antennas

- Telescopic • Helical • Hi-range
